Root Zone KSK Operator Incident Handling Procedure

Version 3.6
Root Zone KSK Operator Policy Management Authority
15 March 2024
1 Introduction
Public Technical Identifiers (PTI) performs the Root Zone Key Signing Key (RZ KSK) Operator role pursuant to a contract from the Internet Corporation for Assigned Names and Numbers (ICANN).

All personnel involving the Root Zone Key Signing Key (RZ KSK) have the duty to protect the confidential information against unauthorized usage, access, modification, destruction, disclosure, and transfer, whether accidental or intentional, and report security incidents, violations, and other problems to the RZ KSK Operations Security (RKOS) on a timely basis so prompt action may be taken.

Note that it is not the task of non-technical personnel to assess the severity or urgency of such problems. The person identified by the RKOS to immediately respond to all such reports will make this assessment.

The key words "MUST", "MUST NOT", "REQUIRED", "SHALL", "SHALL NOT", "SHOULD", "SHOULD NOT", "RECOMMENDED", "NOT RECOMMENDED", "MAY", and "OPTIONAL" in this document are to be interpreted as described in BCP 14 [RFC2119] [RFC8174] when, and only when, they appear in all capitals, as shown here.

2 Objective and Scope
The objective for this procedure is to define requirements and recommendations for handling security incidents or potential security incidents.

3 Roles and Responsibilities
All details pertaining to the security incidents are provided only to appropriate stakeholders such as RKOS, Physical Access Control Manager (PACM), and Root Zone KSK Operator Policy Management Authority (PMA). These stakeholders MAY share incident information with each other. These stakeholders SHALL NOT discuss security incident details openly or with inappropriate personnel.

3.1 RZ KSK Operator Policy Management Authority
The RZ KSK PMA is comprised of PTI and ICANN representatives from functional groups of both organizations. The PMA consists of two types of members: voting members and subject matter experts. All critical decisions related to RZ KSK operations are made by this group. The PMA is responsible for decisions to disclose these incident reports and for coordination with ICANN’s executive and communications teams.
3.2 RZ KSK Operations Security
RKOS is responsible for assessing the incident situation and providing advice to the PACM and PMA, acting as a facilitator and coordinator for all parties involved in handling the incident, and maintaining an audit trail throughout the process.

3.3 Physical Access Control Manager
The PACM approves physical access privileges to Key Management Facilities based on the information provided by the RKOS.

4 Incident Handling Procedures
4.1 Reporting
All security-related issues for RZ KSK operations MUST be reported to the RKOS. Send the information below immediately to cbo@iana.org or root-ksk-pma@iana.org and inform the personnel you have a potential security incident and would like to initiate the incident response process.

</thead>
<tbody>
<tr>
<td>Title</td>
<td>Put “Urgent: Potential Security Incident Report” in the title and flag the email priority “Highest”.</td>
</tr>
<tr>
<td>Date/Time/Location</td>
<td>Describe the detection date and time with the location of the potential incident.</td>
</tr>
<tr>
<td>Contact Information</td>
<td>List the name, department, phone number, and email address of the personnel who detected the potential incident.</td>
</tr>
<tr>
<td>Incident Category</td>
<td>Refer to the Incident Category section (8) and specify which category the reporter thinks applies to the potential incident.</td>
</tr>
<tr>
<td>Incident Classification</td>
<td>Refer to the Incident Classification section (7) and specify which classification the reporter thinks applies to the potential incident.</td>
</tr>
<tr>
<td>Incident Description</td>
<td>Provide a brief description of the incident. Describe what happened, how it happened, the factors leading to the event, the substances or objects involved, etc.</td>
</tr>
<tr>
<td>Actions Taken</td>
<td>Describe the actions taken, if any.</td>
</tr>
<tr>
<td>Potential Loss</td>
<td>Describe what the potential loss is, if possible.</td>
</tr>
<tr>
<td>Witness</td>
<td>Provide contact information for any personnel other than the reporter who know about or witnessed the potential incident.</td>
</tr>
</tbody>
</table>

The incident classification examples below are a reference for personnel for incident reporting purposes. The actual incident rating will be performed by the RKOS.
<table>
<thead>
<tr>
<th>Severity</th>
<th>Classification</th>
<th>Description</th>
<th>Initial Response</th>
</tr>
</thead>
<tbody>
<tr>
<td>5</td>
<td>Extreme</td>
<td>Total loss of business, system, property, or trust; damage impossible to recover from</td>
<td>Within 1 hour</td>
</tr>
<tr>
<td>4</td>
<td>Major</td>
<td>Permanent partial loss of business, system, property, or trust; damage difficult to recover from</td>
<td>Within 4 hours</td>
</tr>
<tr>
<td>3</td>
<td>Moderate</td>
<td>Long-term loss of business, system, property, or trust; damage possible to recover from</td>
<td>Within 48 hours</td>
</tr>
<tr>
<td>2</td>
<td>Minor</td>
<td>Short-term loss of business, system, property, or trust; damage easy to recover from</td>
<td>Within 48 hours</td>
</tr>
<tr>
<td>1</td>
<td>Negligible</td>
<td>No loss of business, system, property, or trust; no damage</td>
<td>Within 96 hours</td>
</tr>
</tbody>
</table>

The incident category examples below are a reference for personnel for incident reporting purposes. The actual incident categorization will be performed by the RKOS.

<table>
<thead>
<tr>
<th>Incident Category</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Denial of Service</td>
<td>Denial of service (DoS) or distributed DoS (DDoS) attacks that will affect the KSK operations.</td>
</tr>
<tr>
<td>Policy Violation</td>
<td>Any activity that would possibly violate the policies and procedures for RZ KSK operations, such as unauthorized escalation of privileges or a deliberate attempt to subvert access controls.</td>
</tr>
<tr>
<td>Compromised Information</td>
<td>Attempted or successful destruction, corruption, or disclosure of sensitive corporate information or intellectual property.</td>
</tr>
<tr>
<td>Compromised Asset</td>
<td>A compromised host, network device, application, user account, etc. This includes malware-infected hosts where an attacker is actively controlling the host.</td>
</tr>
<tr>
<td>Compromised Facility</td>
<td>A physical break-in to a Key Management Facility.</td>
</tr>
<tr>
<td>Unlawful Activity</td>
<td>Theft, fraud, human safety, or computer-related incident of a criminal nature, likely involving law enforcement, global investigations, or loss prevention.</td>
</tr>
<tr>
<td>Hacking/Cracking</td>
<td>Reconnaissance or suspicious activity originating from inside the corporate network.</td>
</tr>
<tr>
<td>Email</td>
<td>Spoofed email and other email security-related events.</td>
</tr>
<tr>
<td>Multi-Factor Incident</td>
<td>An incident to which more than one incident category applies.</td>
</tr>
<tr>
<td>Equipment Failure</td>
<td>An incident in which equipment has a failure or malfunction.</td>
</tr>
<tr>
<td>Other</td>
<td>An incident that could not be classified with any of the above scenarios. Requires a detailed description of the incident.</td>
</tr>
</tbody>
</table>

### 4.2 Assessment

Once the potential incident is reported to the RKOS, the RKOS MUST conduct data collection and perform an initial incident assessment in order to determine the scope and impact to categorize the incident. Then the RKOS MAY establish a response team to remediate the situation.
4.3 Remediation
RKOS (with the assistance of the response team if required) MUST develop a proposed remediation plan. This plan MUST be approved by the PACM if the incident involves physical access control and other facility-related incidents, otherwise the approval of the plan MUST be escalated to the PMA.

The assessment and remediation effort MUST be repeated until the termination of the incident response is declared by the RKOS. Upon termination of the incident response process, RKOS MUST determine if any additional actions are necessary.

Appendix C: Change Log

Revision 3 - 04 October 2018

- Converted the document to use the latest Word template.
- Made minor editorial, formatting, and style changes.
- Made all cross-references hyperlinks.
- Adopted the RFC “MUST”, “SHOULD”, etc. convention throughout each document. Added a paragraph to Section 1 that explains the RFC wording convention.
- Added an acronym list.
- Cover: Changed the version from 1.0 to 3.0 to match the version of other documents.
- Section 2: Added an Objective and Scope section.
- Section 3: Rewrote the introduction to the section. Added explanation of who stakeholders may share incident information with.
- Section 3.2: Clarified the responsibilities for the RZ KSK Operations Security role.
- Section 3.3: Added a definition of the Physical Access Control Manager role.
- Sections 4 through 8: Merged all the sections into a new Section 4. Made Reporting the new Section 4.1, and added the old Section 7 and Section 8 material to it. Made Assessment the new Section 4.2 and Remediation the new Section 4.3.
- Section 4.1: Clarified what the Incident Description should entail.
- Section 4.2: Added a caveat to the last sentence to indicate the action may not always be needed.
- Section 4.3: Clarified what RKOS must do after incident response process termination.

Revision 3.1 - 28 October 2019

- Annual review: Update version information and dates.
- Made minor editorial, formatting, and style changes.

Revision 3.2 - 04 November 2020

- Annual review: Update version information and dates.
- Section 4.1: Added two new incident categories: Equipment Failure and Other.
- Section 4.2: Updated Incident response procedure regarding response teams.
- Section 4.3: Clarified role responsibility.

Revision 3.3 - 22 September 2021

- Annual review: Update version information and dates.
- Section 1: Clarified use of key words as described in RFC 2119 and RFC 8174

Revision 3.4 - 19 October 2022

- Annual review: Update version information and dates.

Revision 3.5 - 12 October 2023

- Annual review: Update version information and dates.
- Made minor editorial, formatting, and style changes.
- Appendix A: Flow chart created to help clarify the incident handling process.

Revision 3.6 - 15 March 2024
- Update version information and dates.
- Changed response time for negligible incidents from 1 business day to 96 hours
